# GAS IN THE STOMACH IS DANGEROUS

Overcome Trouble Caused by Fermenting Food and Acid

Gas and wind in the stomach accom-panied by that full, bloated feeling after eating are almost certain evidence of the presence of excessive hydrochieric acid in the stomach, creating so-called "acid in-Restion. Acid stormachs are dangerous because so much acid irritates the delicate lining of the stormach often leading to gastritis stormach sistemach stormach ulcers. Seed ferments and sours, creating the dispressing gas which distends the stormach und hamners the normal functions of the ampers the normal functions of the internal organs, often affecting the

lt is the worst of folly to neglect such a serious copditios of folly to neglect such a serious copditios of the treat with ordinary digestive aids which have no neutralising effect on the atomach acids. Instead get from any druggist a few ounces of Bisurated Magnesia and table a teaspoonfel in a quarter glass of w. r right after eating. This will drive the gas, wind and bloat right out of the body, sweeten the atomach, neutralize the excess acid and severent its formation and there is no squirness or pain. Bisurated Magnesia (in mowear or tablet form—never liquid or milk) is harmless to the simmach, inexpensive to take and the best farm of magnesia for stomach purposed. It is used by thousands of people who enjoy their means with no more fear of indigestion.
